A ChefBase two drawer underbench fridge designed for busy kitchens at venues such as restaurants, clubs, pubs, and cafés. The fridge is engineered to safely store food in ambient environments of up to 40°C (climate class 5). With GEMS-certified 5M1 performance, standard storage temperatures range from 1°C to 4°C, or are adjustable via the SKOPE-connect smartphone app for specific food types from -2°C to 15°C. The fridge is made from food-safe 304 AISI stainless steel throughout the interior and exterior. The 610 mm high and 815 mm deep cabinet has a worktop suitable for holding a grill or other similar kitchen equipment, and comes complete with a marine edge. The fridge can be positioned on the supplied castors, on a pre-installed plinth by removing the castors, or fitted with optional legs for a finished working height of 705 mm. The two GN-compatible soft-closing drawers are fitted with ergonomic 3 mm gauge stainless steel handles and built-in barrel locks. The fridge has a built-in, integral refrigeration system with side-mounted condensing unit, and uses R290 natural refrigerant for low energy consumption, low heat discharge and low noise output. It is fully front breathing with no side or rear clearance space required and can be easily removed in line with best practice for safe servicing of flammable refrigerants. A controller that connects to the free SKOPE-connect app to enable you to set temperatures and alerts, monitor temperatures and energy, and more comes included. The fridge is certified to all Australian and New Zealand refrigeration and electrical safety standards.
