The Skope ITV GALA NG30 A Ice Cube Maker is Self-contained ice maker producing gourmet-shaped, crystal-clear ice cubes. This ice maker is designed to complement high-end Scotch and Whiskey, as well as being perfect for cafes, as the ice cube is slow to melting which reduces the impact on flavour. The New ITV Smart Front Ventilation System allows the self-contained units to be built in, new units also have an easy-to-access automatic cleaning switch at the front of the unit which disconnects the cooling cycle while circulating water and chemicals to clean the unit.

Description
