Equipped with a digital temperature control system and a high-tech monitor, you have precise control over the internal temperature of the refrigerator. This ensures that your perishable items are stored at the optimal temperature for freshness and quality. The left-hand side compressor and front breathing system make installation flexible and convenient in various kitchen configurations. The refrigerator utilizes HC refrigerant and a hot gas condensate system, promoting energy efficiency and consistent cooling performance. With a generous capacity of 425L, you have ample space to organize and store your ingredients.

The inner temperature range of 1 to 8 degrees Celsius allows for optimal preservation of a wide range of perishable goods. The ventilated cooling system ensures even distribution of cool air throughout the unit, preventing temperature variations and maintaining a uniform storage environment.
