Equipped with a digital temperature control system, this refrigerator allows precise regulation of the interior temperature. The left-hand side compressor and front breathing system ensure efficient cooling and ventilation, maintaining optimal storage conditions. The high-tech monitor enables easy monitoring and adjustment of the inner temperature, which can be set between 1 to 8 degrees Celsius.

The Turbo Air K-Series KUR9-3D-3-N(HC) utilizes HC refrigerant and a hot gas condensate system, making it an environmentally friendly and energy-efficient choice. With a capacity of three full-size 100mm deep GN-pans (GN pans not included), it provides storage for a variety of ingredients. The ventilated cooling system ensures even temperature distribution, while the high-density and CFC-free polyurethane insulation help maintain the desired temperature effectively.
