Introducing the Nuline FW5 Fluid Warmers, a cutting-edge solution for precise and efficient fluid warming. Proudly Australian-made, these fluid warmers are designed to ensure optimal performance and safety. The FW5 features a fan-forced system and double-glazed doors, preventing heat loss and conserving energy. The stainless steel interior and exterior and chrome-plated shelves provide durability and easy maintenance. Equipped with a microprocessor control system and a digital display featuring built-in alarms, the FW5 guarantees accurate and reliable temperature management while protecting against overheating. Whether clinical or laboratory, Nuline's FW5 Fluid Warmers promise dependable and versatile fluid temperature control for various applications.

Description

Commercial Fridge and Freezer Sales Australia. All product images are provided for illustration purposes only. All specifications are subject to manufacturer changes without notice, so please check on the manufacturer's website for current product data.

The FW5 Fluid Warmers

, proudly designed and manufactured in Australia, are a vital addition to any hospital setting. These innovative fluid warmer cabinets are engineered to maintain the precise temperature required for medical fluids. Their fan-forced heating system, combined with a sophisticated microprocessor temperature controller, creates a consistent and stable environment within the cabinet. This ensures that all fluids stored inside are held at the optimal temperature for patient care. Moreover, the built-in high-temperature alarm system acts as an extra layer of protection, preventing fluids from reaching dangerously high temperatures, thereby guaranteeing that they remain safely within the desired range. With the FW5 Fluid Warmers, healthcare professionals can trust that their critical fluids are always at the right temperature, contributing to the overall well-being of patients.

These Australian-made fluid warmers testify to precision and reliability in healthcare settings. With their state-of-the-art design and engineering, they represent an invaluable asset for hospitals, ensuring that medical fluids are consistently and accurately warmed to meet the needs of patients. Incorporating a fan-forced heating system and microprocessor temperature controller guarantees temperature stability throughout the cabinet, effectively preserving the integrity of the fluids. The high-temperature alarm system acts as failsafe, reassuring healthcare providers that the fluids will never exceed the intended temperature, thus prioritizing patient safety. In hospitals, where precise fluid management is critical, the FW5 Fluid Warmers are a trustworthy solution, ensuring that the right temperature is maintained for the best possible care.

Key Features of the FW5 Fluid Warmers:

- Equipped with a fan-forced system for optimal performance
- Features an overheating alarm for added safety
- Boasts double-glazed doors for enhanced insulation
- Constructed with stainless steel both inside and outside, complete with chrome-plated shelves
- Controlled by a sophisticated microprocessor
- Showcases a digital display with built-in alarms
- Proudly Australian-made

Additional Information

Country of Manufacture	Australia
External Colour	Stainless Steel
Brand	Nuline
Model	FW5
Warranty	2 Year Parts and Labour
Temperature Operating Range C	35°C to 50°C
Climate / Ambient Temperature Rating	10-32°C
Temperature Display / Control	Digital control
External Dimensions (mm)	501 (W) x 575 (D) x 625 (H)
Internal Dimensions (mm)	391 (W) x 480 (D) x 430 (H)
Capacity/Volume	Volume - 80 Litres
Other Details	TGA
Power Information	Power Supply = 10 AMP
Door Information	1 Glass Door
Packaged Dimensions (mm)	576 (W) x 670 (D) x 765 (H)
Interior Lighting	No
Internal Colour	Stainless Steel
No. of Shelves Included	2

Heated Doors	Yes
