

Husmann Arch Plus Low Temperature Display Cabinets

Husmann Arch Plus Dual Temp Mounted Cabinet, an innovative solution that elevates customization to new heights. Designed to seamlessly integrate with the base Arch Series, the Arch Plus offers the ultimate in dual-temperature merchandising, maximizing both visual impact and functionality. With its modular section that easily installs on top of the base Arch model, this cabinet allows for efficient space utilization and vertical footprint occupancy. Boasting an ergonomic design for easy product access and flexible shelving configurations, the Arch Plus ensures optimal merchandising possibilities. Notably, its energy-efficient LED lighting, low Total Energy Consumption, and environmentally sustainable design with natural refrigerant showcase a commitment to both cost savings and environmental responsibility. The cabinet's features include easy plug-and-play installation, anti-condensation coating on doors for improved visibility, and a flexible dual-temperature capability (LT and MT) that seamlessly transitions from freezer to chiller. With reinforced shelving, an accessible water drainage opening for easy cleaning, and standard features like external and internal food-grade plasticized metal sheet finish, 5700K LED lighting, and R290 refrigerant, the Arch Plus is a versatile, visually striking, and environmentally conscious solution ready to adapt to diverse store needs.

Description

Husmann Arch Plus Dual Temp Mounted Cabinet

, a versatile solution that takes customization to new heights. Specifically designed to integrate seamlessly with the Arch Series, the Arch Plus mounts on top of the base Arch model, creating the perfect dual temperature merchandising platform. This innovative design allows for efficient space utilization, making a visually striking and functional impact while maximizing the vertical footprint. With a user-friendly plug-and-play installation process, the Arch Plus offers the flexibility to relocate without disassembly, ensuring it adapts effortlessly to evolving store needs.

The product benefits of the Arch Plus are vast and include a modular section that seamlessly integrates with the base Arch Series, enabling the movement of both base and top sections without disassembly. The ergonomic design ensures easy product access, while flexible shelving configurations optimize merchandising opportunities. Boasting energy-efficient LED lighting for the best visual impact, the Arch Plus also prioritizes sustainability with a low Total Energy Consumption and an environmentally friendly design using natural refrigerant. This dual temperature cabinet effortlessly transitions from freezer to chiller, meeting diverse customer demands. Standard features such as a food-grade metal sheet finish, 5700K LED lighting, ticket strips, and an accessible water drainage opening for easy cleaning further enhance the functionality and appeal of the Arch Plus. With reinforced shelving, anti-condensation coating on doors, and automatic hot-gas defrost, this cabinet is a comprehensive solution for businesses seeking an adaptable and visually appealing dual-temperature merchandising option.

Key Features of the Husmann Arch Plus Dual Temp Mounted Cabinet:

- Food-Grade Metal Sheet Finish: Both external and internal surfaces coated with food-grade plasticized metal sheet.
- LED Lighting: Vertical installation of LED lights with a color temperature of 5700K.
- Ticket Strips: Strips provided for displaying tickets.
- Ventilated Refrigeration System: Equipped with a copper evaporator for efficient ventilation.
- Digital Temperature Controller: Includes a digital controller with a temperature display.
- Condensing Unit: Ventilated condensing unit for optimal performance.
- Self-Closing Glass Doors: Doors made of glass, hinged for self-closing functionality.
- Automatic Hot-Gas Defrost: Features an automatic hot-gas defrost system.
- Shelves Configuration: Two rows of shelves plus a base configuration.
- Refrigerant: Uses R290 refrigerant.
- EC Fan Motors: Incorporates electronically commutated fan motors.
