The Husmann HCCR Hot Cold Combination Display Cabinets are versatile self-contained multideck units, meticulously crafted for dairy products, drinks, deli items, and various medium-temperature applications. Offering easy plug-and-play installation and a digital controller with temperature display, they ensure hassle-free setup and monitoring. Their ergonomic design facilitates convenient product access, while optimized LED lighting enhances visual appeal and reduces product dehydration. With low Total Energy Consumption (TEC) and compliant product temperatures, these cabinets offer efficiency and reliability. Standard features include a full stainless steel upper section, painted internal lower section, and a fully self-contained R449A system. The hot top section combined with a chiller lower section provides flexibility, and LED lighting ensures enhanced visibility in the lower section. Equipped with a protected evaporator assembly and digital thermometer display, these cabinets offer simplicity in installation and maintenance, making them an ideal choice for diverse retail environments.

Description

Introducing the Hussmann HCCR Hot Cold Combination Display Cabinets

, designed to cater to a variety of medium-temperature applications including dairy products, beverages, deli items, and more. This self-contained multideck open front chiller offers effortless plug-and-play installation along with a digital controller featuring temperature display for precise temperature management, ensuring optimal product freshness. Boasting an ergonomic design for easy access, the HCCR combines hot and cold merchandising capabilities in one unit, offering versatility to businesses seeking efficient display solutions. Its optimized display, complemented by LED lighting, enhances product visibility and visual appeal while minimizing product dehydration. With low Total Energy Consumption (TEC) and compliance with product temperature standards, this unit ensures both energy efficiency and product quality. Featuring a full stainless steel upper section and painted internal lower section, the HCCR is equipped with fully self-contained R449A refrigerant, a hot top section paired with a chiller lower section, and LED lighting in the lower section for enhanced visibility. Simplified installation and maintenance make this combination display cabinet a preferred choice for businesses looking for reliable and flexible merchandising solutions.

- Upper section made entirely of stainless steel
- Internal lower section painted for protection
- Fully self-contained with R449A refrigerant
- Hot top section with chilled lower section
- Top tier measures 705mm
- LED lighting installed in the lower section
- Evaporator assembly is protected and fitted with a valve
- Equipped with a digital thermometer display
